

TOIT TRAINING LLC

Certified Incident Handling Engineer (CIHE)

Overview: This Official Mile2® cyber security certification training series covers everything you need to know about becoming a Certified Incident Handling Engineer. Students will learn about threats, vulnerabilities and exploits, IH preparation, request trackers for incident handling, preliminary responses, identification and initial responses, sysinternals, containment, eradication, follow-up, recovery, virtualization security, and malware incident handling. As a Certified Incident Handler, you are prepared to effectively help incident handlers, system administrators, and general security engineers understand how to plan, create, and utilize their systems in order to prevent, detect, and respond to security breaches. Every business connected to the internet is getting probed by hackers trying to gain access, making it a necessity to have someone that knows how to detect and resolve security breaches. This certification is ideal for those who lead incident handling teams or are part of an incident handling team.
