# Certified Information Systems Security Officer (CISSO) Series\*

**Overview:** This Official Mile2® cyber security certification training series covers everything you need to know about becoming a Certified Information Systems Security Officer. Students will learn about risk management, security management, authentication, access control, security models, operations security, symmetric cryptography and hashing, asymmetric cryptography and PKI, network connections, network protocols and devices, telephony, VPNs and wireless, security architecture, software development security, database security and system development, business continuity, disaster recovery, incident management, law, and ethics, and physical security. Being a Certified Information Systems Security Officer will provide you with the advanced skillset necessary to manage and consult businesses on information security. You will possess the knowledge and skills expected of a security leader. Through the use of a risk-based approach, a CISSO is able to implement and maintain cost-effective security controls that are aligned with business requirements. Becoming a CISSO is the ideal way to increase your knowledge, expertise, skill, and credibility.
